contents

001 development, systems & programs
biological systems

primary process – imagination

mind and brain

PROGRAMS

Foundation programs & system requirements: emergence, matrices as contexts

Master programs: plasticity, epigenetics, hormesis

TECHNIQUES

Assessment

Common problems: snapback

002 operational modes and main applications

system modality

primary modes: growth & repair, protection

secondary modes: stretch, relax and salience

PROGRAMS

the processing cycle of emergence

learning, memory & creativity programs

TECHNIQUES

Switching operational modes

Common problems: Getting stuck in protection mode

Attention control

003 reprogramming developmental pathways

signals: biological imperatives

domestication

PROGRAMS

drives & instincts

intent

situational assessment programs

housekeeping programs

TECHNIQUES

Input control – becoming epigeneticallly proactive

Common problems: symptom postponement

Upstream diagnostics

004 system volitional control

the developmental dilemma

system congruity

PROGRAMS

volitional control programs: embodiment, sync, modeling

TECHNIQUES

Behave as though

Common problems: incongruity

cognitive dissonance

Reframing

Input control in other domains

005 the relativity of understanding

emotional stability

operational moods – the elements of emotion

PROGRAMS

Theory of Mind, empathy, bonding

TECHNIQUES

Emotion control

Common problems: lack of emotional control

006 interaction and relationships

interaction, action and reaction

types of archetypal relationships

PROGRAMS

interaction

biological morality

loyalty

TECHNIQUES

Output control

Common problems: the retrospective bummer

Common issues in relationships

Conflict resolution

007 code and formats

model dependent realism

concepts and core concepts

categorization

PROGRAMS

categorization software

processor formats

synesthesia

metaphorization

TECHNIQUES

Common problems: normalcy bias

discourse analysis

008 cognitive development

what is cognitive development?

self-actualization

the quality of life

PROGRAMS

Eidetic variable assembly, story code & archetypes

aesthetic assessment programs

aesthetics and biomorality

TECHNIQUES

common problems: lack of energy

cognitive development & rewilding

self suggestion and hypnosis
